Once the project is complete, dedicated express lanes will run adjacent to the existing general purpose lanes. The number of general purpose lanes will remain the same as today. Drivers will have the choice of using the express lanes to avoid travel delays, the general purpose lanes or a combination of both. Vehicles with three or more occupants (including the driver) and equipped with a transponder may use the express lanes for free. The full 26-mile project is slated to be completed in 2018.
